

# AI for Stochastic Dynamics

From Theoretical Foundations to Scientific Applications

December 11 or 12, 2026

International Convention Centre Sydney

A one-day workshop connecting stochastic analysis, dynamical systems, scientific machine learning, generative modelling, and AI for science. We bring together researchers developing principled methods for learning, simulating, and controlling complex stochastic systems.

## INVITED SPEAKERS

**Nikola  
Kovachki**  
NVIDIA

**Gary Froyland**  
UNSW Sydney

**Hao Ni**  
University College  
London

**Hong Liang**  
Shanghai Jiao Tong  
University

**Zongyi Li**  
MIT / NYU

**Anima  
Anandkumar**  
Caltech
